

# CS Sprayer

SDI's **CS Sprayer** with rugged contoured fiberglass tank and 12 volt diaphragm pumps for use in enclosed cargo vehicles.

SDI CS30 installed in a Nissan NV200®

- Designed to attach to the sealed bulkhead separating the cargo area from the passenger compartment.
- Compact, contoured fiberglass spray tank allows access to the rest of the cargo area.
- The hose reel is trolley mounted to allow you to work from either side of the vehicle.
- Two 12 volt diaphragm pumps, one for agitation and the other for spray. The pumps operate off their own battery. The pump battery is recharged by the vehicle charging system.

Trolley Mounted Hose Reel with 300 feet of 1/4" Spray Hose allows you to operate from either side of the Vehicle

### Special Features of the SDI CS Sprayer:

- Commercial grade 30 gallon fiberglass spray tank is contoured to allow easy access to the cargo area. Shown in SDI green with other colors available as well as other sizes depending on your vehicle's weight capacity.
- The tank is attached to the non-permeable bulkhead separating the cargo area from the passenger compartment.
- Twin 12 volt diaphragm pumps, one for agitation and one to power the spray gun.
- Integrated 12 volt battery powers the pumps and recharges when the vehicle is running.
- Shown with an electric rewind hose reel with 300 feet of 1/4" spray hose, other lengths, hose sizes and reel configurations are available.
- The hose reel trolley system is also adaptable to multiple vehicles.
- SDI's venturi-jet agitation system provides complete mixing of your spray materials.
- Two line strainers prevent debris from entering the spray tank or spray hose.
- Operating Controls are grouped together for easy operation with LED indicators.
- Corrosion free spray system featuring a reinforced fiberglass tank, nylon, PVC, stainless steel and brass components.
- The heavy duty welded steel frame is epoxy coated for durability and strength.
- Dimensions are 53" wide, 27" high and 15" deep.
- Contact your dealer or SDI for more information.

Separate battery to power the pumps is recharged by the vehicle.

Electric rewind hose reel with 300 feet of 3/8" spray hose.

Controls are grouped together for easy access and operation.
