

Hose Caddy

Manual Rewind Hose Reel and Trailer

The **Hose Caddy** from SDI features a manual rewind hose reel with 100 feet of 1 inch hose and hose end nozzle. There is a hose roller assembly to keep the hose organized and neat when winding it on the reel. The feed side features a holder for your quick coupling key and a stainless steel swivel.

Imagine not dragging your irrigation hose around the course. No more broken or inadvertently removed tee markers or other obstacles. No more kinked or bent hose. Your hose will last longer and stay organized, ready for use.
