

Optimum Turf Walkers

Lightweight Walking Spray Booms

Turf Walker 6.5 and Turf Walker 10 (folded)

Whether you are spraying a large area or small area, **SDI** builds a **Turf Walker** to fit your needs.

Designed to be used in combination with a sprayer and hose reel.

SDI Turf Walkers include a stainless steel “wet” boom, speedometer, trigger handle, liquid filled pressure gauge, adjustable spray height and triple wheel design for improved stability.

- **Turf Walker 6.5** - (80 inches/2 meters wide) 8 drip free nozzles on 10” centers.
- **Turf Walker 10** - (120 inches/3 meters wide) has **three sections** with individual controls, 4 drip free nozzles per section on 10” centers, 12 nozzles total. The outer sections fold for easy transport and allow it to fit easily through narrow areas.

Turf Walker 6.5

Turf Walker 10

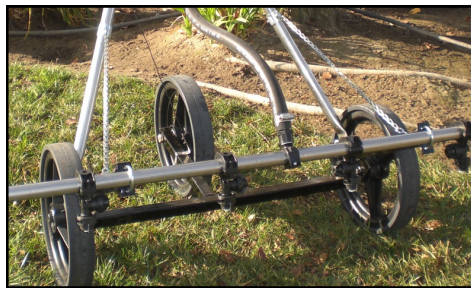

The triple wheel design uses smooth tread, 3 spoke 12" semi-pneumatic wheels for a minimal footprint. This provides maneuverability, stability and consistent boom height.

The trigger handle includes a liquid filled pressure gauge and speedometer. The handle angle is adjustable to allow for comfortable use by multiple operators.

The **Turf Walker 10** has 3 ball valves to control the flow of liquid to each boom section.

The spray boom is easily adjustable for height and spray angle. Just shorten the chains to increase the height and rotate the boom to change the angle. The drip free nozzle bodies have quick connect caps to easily change the spray tips. The included spray tips are TP8003VP.

The optional **Turf Walker** carrier bracket attaches easily to any SDI spray boom for easy transport and storage on your sprayer.
