Metal framing support system is designed with many time-saving features. Fully adjustable and reusable, with a complete line of channels, fittings and accessories for multi-purpose applications.

- No Welding
- No Drilling
- Use Your Imagination

Metal framing installs quickly. There is no need for special tools. All you need is a wrench and hacksaw. Channels and parts can be taken apart for reuse as quickly as they were assembled, yet they provide the strength of welded construction. Eliminating welding and drilling produces substantial savings in time and labor.
